

# PROVE what you can do.

Our training and certification course graduates are among the most sought-after Linux and open source experts.

**Red Hat offers the highest quality Linux and open source training and certification available.**

Obtaining Red Hat Certified Engineer (RHCE) certification ensures you have the latest information and skills needed to successfully deploy Red Hat Linux Enterprise Edition optimised for Oracle8i in any IT environment.

Customers prefer technology professionals that are certified for mission-critical enterprise systems. As the demand for enterprise-level data management on open source platforms increases, solution providers with proven certifications, skills, and experience will benefit from this growing opportunity.

**Red Hat Certified Engineer (RHCE) certification will help you:**

- Build the value of your business as a recognised, certified expert in an exciting, high-growth market
- Quickly add open source credentials and expertise to your product offerings
- Acquire high-demand skills such as integration, networking services and security
- Learn from expert Red Hat Certified Engineers in a hands-on, interactive setting

All Red Hat courses are taught by **Red Hat Certified Engineers** with considerable Internet and development experience. **Red Hat can also customise training and certification courses. On-site. Anywhere in the world.**

**Red Hat offers numerous training courses based on your skill level and interest:**

RH 033	Introduction to Red Hat Linux I, II (4 days)
RH 133	Red Hat Linux System Administration I, II (4 days)
RH 253	Red Hat Linux Networking and Security Administration (4 days)
RH 300	RHCE Rapid Track Training and Certification Course (5 days)
RH 302	Red Hat Certified Engineer Exam (1 day)

## Red Hat Certified Engineer (RHCE) programme

**Ready to prove your skills?** Become a Red Hat Certified Engineer. RHCE tests your ability to install, understand and configure the latest Linux release, as well as file systems, security common network (IP) services such as HTTP, DNS and DHCP. Even some of the world's leading open source applications like Sendmail and Apache Web server. Pass, and you'll be ready to get your Red Hat experience working for you.

### We offer certification through one of two certification tracks:

Standard track includes a series of in-depth, skill-building courses, perfect if you're just getting started as an IT professional or transitioning from MCSE, MCP or CNE.

Rapid-Track is ideal for UNIX and Linux experts who are ready to prove their skills. It includes four days of intense, hands-on training, with the RHCE exam on the fifth day.
